## **NIKSUN Announces NetDetectorLive™ – Real Time Content and Compliance Monitoring Solution**

**RSA Conference, SAN JOSE, CA, USA, February 15, 2006** – NIKSUN, Inc., the leading provider of real-time security surveillance, forensic analysis, compliance and performance monitoring solutions, today announced NetDetectorLive, a content and compliance monitoring tool. NetDetectorLive enables companies to monitor content flowing into and out of their corporate networks to facilitate adherence to corporate, governance and regulatory policies.

NetDetectorLive builds upon the award winning foundation of NIKSUN's patented real-time analytics engine by providing fast and accurate monitoring of content. In addition to custom alert and scanning capabilities, NetDetectorLive provides users with templates of regulatory and corporate policy profiles making it immediately useful right out of the box.

“In this era of Government mandates to comply with laws and regulations such as Sarbanes-Oxley, HIPAA, and the EU Data Protection Directive, it is vital that corporations have solutions to enable compliance”, said Charles Kolodgy, research director of Secure Content and Threat Management Products at IDC. “NetDetectorLive is an enabler for compliance that works like a Tivo® and Google® for the network, allowing users to not only rewind to and playback compliance violations but also to search all data flowing on a network for forensic reconstruction of surreptitious activity.”

“Our existing customer base of large enterprises and government organizations have been asking us for these capabilities for some time now”, said Dr. Parag Pruthi, Chairman and CEO of NIKSUN. “Our team of Ph.D.'s and scientists have been researching this problem and developing prototypes for over two years. We have finally been able to develop a revolutionary product to make the day-to-day job of dealing with compliance and regulatory matters a snap. I am certain that this product will be a big hit in the market and bring real value to our clients.”

NetDetectorLive is available in many platforms and storage options for monitoring a variety of LAN and WAN networks. NetDetectorLive seamlessly integrates with NIKSUN's Enterprise management suites and provides a complete enterprise wide solution.

NIKSUN NetDetectorLive is available from NIKSUN's worldwide reseller and distribution partners. For further information about NetDetectorLive please visit <http://www.niksun.com/>.
